

Hello, my name is NICI Bear, and I would really like to be your friend. I can listen and reply to several sentences, and I can tell you exciting stories if you say the right sentence (see sentences below in Part II – Instructions).

My name is actually NICI Bear, but you can also give me another name like Alwin Bear, Benni Bear, Bodo Bear, Charley Bear, Danny Bear, etc.

## Instructions:

**ATTENTION: For reasons of safety, remove all wires and plastic or rubber bands, hangers or other packaging materials from the toy before you give the toy to a child to play with. Please retain the instructions for reference!**

**Batteries are not included!**  
**Batteries may only be inserted or taken out by an adult or under supervision of an adult!**  
**Two type AA batteries (1.5 Volt) are required.**  
**Do not use rechargeable batteries! Do not use different kinds of batteries together nor mix up used and new batteries!**

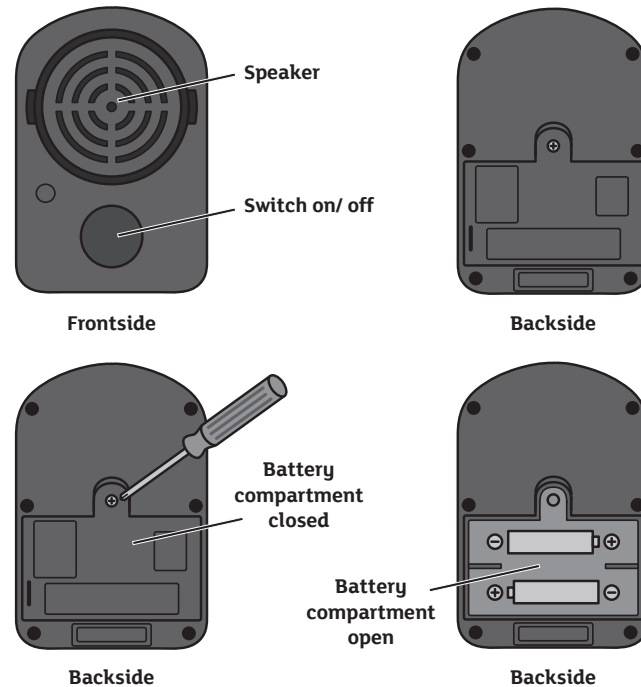

## I. Inserting the batteries (NOT INCLUDED!) and initiation of voice module:

**Step 1:** Take the voice module out of the cuddly toy. The module is inside the bear's back which is closed by Velcro.

**Step 2:** Open the cover of the battery compartment with a screwdriver.

**Step 3:** Insert the batteries in the designated spaces. Observe the proper polarity.

**Step 4:** Close the cover again using a screwdriver.

**Step 5:** Place the voice module back into the back of the cuddly toy. Make sure that the battery compartment points upwards, and that the on/off switch is positioned under the bear's bellybutton. Close the back of the bear with the Velcro fastener afterwards.

## II. Instructions:

Wake the bear by pressing his bellybutton (sound module has to be positioned so that the on/ off switch is under the bellybutton). He will reply with a "Hello". Then talk to him using the name that you have thought up. Here, it is important that the word "Bear" always comes after the name. We gave him the name "NICI Bear" but you can also call him e.g. "Benno Bear", "Bodo Bear", "Dennis Bear", etc.

The bear will answer you with "Yes!".  
Now you can ask him questions and talk to him. He can even tell you stories.

You can exchange the following questions/sentences with the bear, after you have switched him on:

Child says:	Bear replies:
How're you doing?	<i>I'm very well, thank you.</i>
Are you hungry?	<i>Oh yes, I'd love some fresh fruit.</i>
Do you want to play?	<i>Oh yes, let's play a game together.</i>
Do you want to go to sleep?	<i>Yes, please sing me a lullaby.</i>
I love you.	<i>I really love you, too.</i>
I have a secret.	<i>Tell me and I promise I won't tell anyone else.</i>
What's your biggest wish?	<i>I'd wish for us to be friends forever.</i>
What's your favourite colour?	<i>My favourite colour is honey yellow.</i>
Are you happy?	<i>I'm always happy when I'm with you.</i>
I'm sad.	<i>Let's cuddle and you'll soon feel much better.</i>
Can you tell me a story?	<i>Of course, listen to this ...</i>
I can't sleep.	<i>OK, I'll tell you my favourite bedtime story ...</i>
I'm bored.	<i>a) Let's draw something! b) Let's play something! c) Let's dance!</i>

If the bear did not understand the sentence he will answer: *I'm sorry, could you please say that again.*

If it is too loud where you are then he will answer: *It's too loud here, I can't hear you!*

You can switch off the bear at any time just by pressing the bellybutton again. If you don't speak to him for longer than one minute then the bear will fall asleep. He will yawn and say: "I'm so tired!", then the bear will turn off automatically.

## III. Cleaning

**Attention! Voice module must be taken out before washing the bear!**

**Bear:** Washable at 30°C, do not tumble dry.

**Voice module:** Surface washable with a moist cloth. Do not allow liquids to penetrate the battery compartment!
